EDUCATION

Full Stack Software Development Certificate

Bellevue WA, Coding Dojo (2019) (Graduating at the end of July)

- Software Engineering boot camp over 14 weeks teaching an intensive 3 full stack curriculum
- Each stack involved the understanding and reinforcement of core concepts, learning through iteration, collaboration, and pair programming
- At the end of each stack competency and efficiency was tested by building a full stack application under five hours

A.A Business Administration, General Studies

Orlando FL, Valencia College (2017)

- Attended concurrently while in high school
- Honors: Dean's List, President's List

High School Diploma

Orlando FL, Olympia High School (2018)

- Honors: Graduated Top 10%, Summa Cum Laude
- Activities: National Honor Society, Key Club

SOFTWARE PROJECTS

JavaScript/MEAN

Coming Soon (At the end of MEAN stack)

C#/.NET EF Core

Web application built at the end of C# stack

- Collaborated in a team of two to build a restaurant review web application
- The project was written in C#, using Entity Framework Core, and MySQL
- Features implemented include user login/registration, admin login/registration, 3rd Party Authentication, user review feature, emailing capabilities between user and web application company, image upload capability, and search feature to find restaurants with speech-to-text feature.
- Project Timeline: 5 days

Python

Web application built at the end of Python stack

- Collaborated to build and design a pet spa business web application
- The project was written in Python using Django, and MySQL
- Implemented features include login, registration, adding pets to user's account, and appointment scheduling
- Project Timeline: 5 days
